Graduate Library School Institute

THE topic of the thirteenth annual institute of the Graduate Library School of the University of Chicago will be "Education for Librarianship." The institute will be held at the university during the week of Aug. 16-21, 1948.

Although the institute will deal with problems in the education of librarians, it will by no means be limited in interest or in relevance to the staff members of library schools. It is also intended for the practitioners in librarianship and is being planned for the profession as a whole, since the entire profession is affected by the educational programs adopted by the schools. Both practitioners and educators will contribute to the program.

The institute will deal with such topics as the place of professional education in the university, the relationship between education for librarianship and education for other professions, the preprofessional background of librarians, the content of basic library training and training in special fields, and the state of advanced training and research in librarianship.

The detailed list of topics and speakers will be announced soon.
