

College and University Library Statistics, 1955-56

MORE LIBRARIES RETURNED the statistical questionnaire this year than ever before. Excluding the junior colleges, the questionnaires were mailed to 566 libraries in August. Only 246, or 43 per cent, returned them by the Committee's deadline of October 1, 1956. At that time, follow-up requests were sent to the 135 libraries whose data were included in previous compilations. By October 15, 1956, 177 additional reports had been received. Of the total received by this date, the Committee was able to use reports from 409 libraries. Approximately 100 institutions failed to return the statistical questionnaire.

The published data are essentially the same as last year. However, in an effort to interpret more clearly the figure representing per student operating expenditures, the Committee asked that extension students be reported separately. Even though librarians were requested to report the same figures as submitted to the U. S. Office of Education, there are still too many variables which distort these ratios. Also, the heading "total institutional expenditures" was changed to read "total educational and general institutional expenditures."

The libraries were grouped as in former years. Group I includes state universities as well as those institutions with fairly strong graduate programs. Group III includes libraries whose operating budgets are less than \$35,000.

The statistics were compiled again by members of the Committee, which included three new librarians whose names appear below. The Association owes these librarians a debt of gratitude for the great amount of time spent in producing these tables.

Mr. Bentz, chairman of the ACRL Statistics Committee, is associate director of the State University of Iowa Library.

Group I: Compiled by James Ranz

DIRECTOR OF LIBRARIES,
UNIVERSITY OF WYOMING

Of the 126 questionnaires mailed to Group I libraries this year, 110 were returned, in varying degrees of completeness. All have been included in the prepared tables.

During the past year, library expenditures advanced markedly, but still lagged behind the increases in total institutional expenditures. Eighty-one institutions reported their total institutional expenditures and total library expenditures for both 1954/55 and 1955/56. Collectively, these 81 institutions spent 10 per cent more for their total operations in 1955/56 than they did in 1954/55, but only about 7½ per cent more for libraries.

Some interesting comparisons are also to be found in the salaries paid professional librarians in 1954/55 and in 1955/56. The beginning professional salary, if we take it to be identical with the median minimum salary paid "All Other Professional Assistants," increased from \$3,336 to \$3,586. The average salary for all professional librarians was \$4,422 in 1954/55, \$4,741 in 1955/56. (Figures result from multiplying the average of the median minimum and median maximum salaries for each category by the number of librarians within that category, adding the products thus secured for all categories, and dividing this sum by the total number of librarians in all categories.)

Group II: Compiled by J. Richard Blanchard

LIBRARIAN, UNIVERSITY OF CALIFORNIA,
DAVIS, CALIFORNIA

Questionnaires were returned by 97 libraries. Of these, four were received too late for tabulation. During the tabulation many mistakes were discovered and, it is hoped, corrected properly. A comparison with the Group

II statistics for 1954/55 shows a continuing rise in enrollments, library collections, expenditures, and salaries. However, considering inflationary pressures and increasing enrollments, it would appear that budgets for the majority of Group II libraries are still far from adequate.

**Group III: Compiled by
Clarence Gorchels**

ASSOCIATE LIBRARIAN,
WASHINGTON STATE COLLEGE

Librarians represented in the Group III category again deserve congratulations for their cooperative attitude toward providing library statistics. This year 113 librarians (one more than last year) in this group responded with information. It is especially gratifying to note that the median salaries for professional librarians are well above the medians of last year. However, comparisons in this area, as in all others, must be made with considered judgment, since the libraries in this group show a good deal of variation in enrollment, type of library service given, amount of nonsalaried service, and interpretation of definitions in the statistical form.

**Teachers Colleges: Compiled by
Robert R. Hertel**

LIBRARIAN, STATE UNIVERSITY TEACHERS
COLLEGE, CORTLAND, NEW YORK

Ninety-six libraries returned questionnaires, and 94 libraries are included in the statistics. Since the deadline for inclusion was extended, some information which was reported in different form than that requested (e.g., total work hours for a professional librarian in the fiscal year) could not be corrected in time.

Fifty-nine libraries, comprising nearly 63 per cent of the total number reporting, include their extension enrollments in the computation of per student expenditures. Some teachers colleges do not have programs of extension courses which require library serv-

ice or do not yet provide additional revenues to finance library service for existing programs. The increased service load of extension students has a significant effect upon the per student expenditure figure. Nearly 51 per cent of the libraries which support these extension programs reported a figure below the median of \$29.07. Administrators of teacher training libraries face many perplexing problems in financing and supplying extension services. It would be valuable for them to know the various bases for financing these services, whether by per capita, by per capita of full-time equivalents, by lump sum, or by some other means. A study of existing extension services is definitely needed for the guidance of teachers college librarians.

**Junior Colleges: Compiled by
Ruth E. Scarborough**

LIBRARIAN, CENTENARY JUNIOR COLLEGE,
HACKETTSTOWN, NEW JERSEY

Statistics questionnaires were sent to all junior colleges in the country. Thirty-seven states and the District of Columbia are represented in the 147 colleges reporting, which is a 100 per cent increase over last year's returns. Unfortunately, 21 questionnaires were received after the deadline and could not be used.

Several items in the questionnaire differ from last year and from the other groups: student enrollment for day and evening, salary data in three divisions for the librarian, professional assistants and non-professional assistants, and number of months on duty. Since per student operating expenditure is figured on a total of day and evening students, this figure may seem small where the college has an unusually large evening enrollment. The enrollment was separated for day and evening students and footnoted for dormitory students to give a clearer picture of the college situation as it might affect the use of the library, size of library staff, etc.

A limited number of reprints of the 1955-56 statistics are available from the ACRL office in Chicago at seventy-five cents a copy, or at fifty cents a copy if payment accompanies the order.

ciné and Dentistry. 21. Excludes Branch College Libraries. 22. Excludes Law Library. 23. Includes \$17,500 nonsalaried service. 24. Included in staff salaries. 25. Includes \$1,500 nonsalaried service. 26. Off-campus binding only. 27. Includes heat, light and water. 28. Includes \$300 nonsalaried service. 29. Excludes College of Medicine and its Library. 30. Includes \$49,125 nonsalaried service. 31. Includes expenditures for social security and annuities. 32. Excludes "Other Operating Expenditures." 33. Includes dormitory costs. 34. Includes 1,092 Air Force personnel enrolled in residence centers on six air bases. 35. Off-campus students in European and North Atlantic programs not included. 36. Includes administrative costs on \$34,000,000 defense contracts. 37. Evanston campus only. 38. Includes off-campus extension students. 39. Excludes government contracts. 40. Number of libraries on which high, median and low are based. 41. In computing this figure, off-campus extension students have been omitted. 42. Includes expenditures for the University Hospital. 43. Includes 9,835 part-time students in the Evening Division, Chicago Campus.
